

Handover Card

Carpet Cleaners

Parts included	Hose, wand and upholstery tool
Recommended Safety equipment	N/A
Consumables	Cleaning solutions

Step 1
Push fit the vacuum hose onto the spigot.

Step 5
Simultaneously press the vacuum switch and solution pump switch.

Step 2
Push fit the solution hose onto the connector. It has been seated correctly when the collar clicks into place. Connect the vacuum hose and the clear solution hose to the wand assembly.

Step 6 and 7
Press the wand/hand tool head firmly against the area to be cleaned. Squeeze the trigger to spray the cleaning solution. Whilst maintaining a firm downward pressure, pull the wand or hand tool slowly backwards to extract the dirty solution. CAUTION - never over wet any carpet or upholstery. Do not repeat a wet pass more than twice. If two wet passes failed to remove a stain, always wait for the carpet or upholstery to dry before reapplication.

Step 3
Fill the solution tank at the rear of the machine with 8 litres of warm water (NOT BOILING!), mixed with cleaning solution using the manufactures guidance. Use the white waste bucket located under the transparent cover at the front of the machine to fill the solution tank.

Step 8
Switch off the machine and lift off the transparent cover. Remove the waste bucket and empty. Repeat steps 3 to 8 until cleaning is completed.

Step 4
Replace the white waste bucket at the front of the machine and re-seat the transparent cover. CAUTION—incorrect seating of the transparent cover may impair the machine's vacuum lift performance.

Step 9
For upholstery simply replace wand with hand tool and apply as per carpet cleaning technique.

REMEMBER: PLEASE CLEAN THE MACHINE BEFORE RETURNING IT TO HIRE STATION.
